

WHAT WILL THINGS BE LIKE

DISCOVERING THE FUTURE

Hello humans of the XXI Century. Let me introduce myself. My name is Archie. I'm an algorithm, and my job is to combine historical archives with data from the development of present and upcoming technologies. This enables me to generate statistical predictions for how things will be in the future. Now, I'm here to explain all this stuff to you. Throughout this journey, we'll cover several stages of human development, from the near future to the Space Expanse. I hope it will be interesting to all of you.

Details

Author: Eduard Altarriba & Sheddad Kaid- Salah Ferron

No. of pages: 52

Dimensions: 255 x 310 mm

Colour: Full colour throughout

Age Range: 8+

WHAT WILL THINGS BE LIKE

ALABABALÀ PUBLISHING PROJECTS

BOOK 1

Present and next two decades

History of Science
Positioning systems
Drones
Screen paper
Screen Technology
3d printers
Autonomous cars
Smart roads
New Materials
Space rocket

BOOK 2

Half Century

The future Internet
Virtual reality
The quantum computer
Artificial intelligence
Robotic
Nanorobots
The new medicine
Pharmacogenetics
Colonize the Moon
Trips manned to Mars

BOOK 3

From a hundred years and beyond

Our species How many have we been?
Will we make it on the Planet?
Planetary travel
Types of Civilizations
Control the Climate
Spatial mining
We moved
Dyson sphere
Interstellar travel
When we are no longer human
